

H&E EQUIPMENT SERVICES QUALITY USED CONDITION STATEMENT

“Quality Used” machines advertised on this website are units that have been examined, inspected and qualified as quality used equipment by H&E Equipment Services (H&E).

“Quality Used” machines have been inspected and evaluated by factory-trained H&E service professionals and are ready to operate and perform the job intended for that particular model.

The general condition of “Quality Used” classified units is as follows:

- All safety components have been checked and are functional.
- Minor repairs and maintenance has been performed to put machine into a reasonable operating condition.
- All machine functions are operating.
- Machine has been cleaned and serviced per standard maintenance guidelines.
- Fluid levels have been checked and topped off.
- All noticeable leaks have been addressed and repaired.
- All tires or ground engaging components are in a safe, workable condition.
- Units can be further repaired, reconditioned and customized to meet a customer’s needs at additional cost.

All “Quality Used” status machines advertised on the H&E website carry a 30-Day Power Train Warranty. [Click here for warranty details.](#) Warranty coverage and service is available throughout the United States and is not limited to H&E locations. Additional extended warranty coverage is available. Ask your H&E Sales Representative for details on pricing and terms.
